ABSTRACT

The present study pot experiment was conducted to identify the potential of Sargassum wightii seaweed liquid extracts were given to the tested plant in form of foliar spray.

The presence of micro and macro nutrients ,vitamins, growth hormones and other constituents in the seaweed extract might be very much useful to the crops and also the liquid seaweed extracts could serve as eco-friendly product for sustainable agriculture.

KEYWORDS: *Seaweed Extract, Sargassum Wightii, Capsicum Annum, Plant Immunity*
